What is Blockchain Technology?

Blockchain technology is a decentralized digital ledger system that securely records transactions across multiple computers. It is the foundation for cryptocurrencies like Bitcoin and Ethereum but has applications beyond finance. Here's a simple breakdown:

- ▶ **Decentralized:** No central authority—data is shared across a network of nodes.
- ▶ **Immutable:** Transactions, once recorded, can't be changed.
- ▶ **Blocks & Chains:** Data is grouped in blocks, linked together securely.
- ▶ **Secure:** Uses encryption to protect data from tampering.
- ▶ **Smart Contracts:** Self-executing, tamper-proof digital agreements.

Beyond Crypto:

Used in supply chains, healthcare, voting, and more.

- ▶ **Transparent:** Everyone on the network can see the data.

The statement suggests that when two types of matrices are used together in a program, they complement each other in such a way that their combined benefits outweigh any individual drawbacks. This synergy results in a more effective or efficient system.

The foundational software utilizes both B6 and B3 types of matrices simultaneously. The numbers 6 and 3 represent the number of positions in each respective matrix. The true power of these matrices emerges when used together. Each matrix type has its advantages and disadvantages, but in a single program, the advantages outweigh the drawbacks.

Referral connections are securely stored across all our programs, providing you with long-term benefits.

HOW SHOULD A BEGINNER GET STARTED?

To start a Holiwave business, you need USDT on the BNB network. A small amount of BNB coins is required to cover transaction fees. Your first transaction will be a null transaction, which acts as your registration. **Once registered, you Édon't need to re-register for future programs, allowing you to access new programs earlier.**

Ensure you register using the referral link of the person who introduced you to the business. This increases the chances that those you invite will also use your referral link to register.

HOLIWAVE

The Amount Upon Payment, Is Immediately Transferred To The Wallet Of Your Higher-level Partner, And You Simultaneously Fill Your Inviter's Matrix.

At The Same Time, Your Personal Matrix Is Activated, Consisting Of Six Slots: Two On The First Level And Four On The Second.

If You Were Placed In Your Upline's Matrix, Your Matrix May Partially Overlap With Theirs, Particularly If You Occupy A Slot On Their First Level.

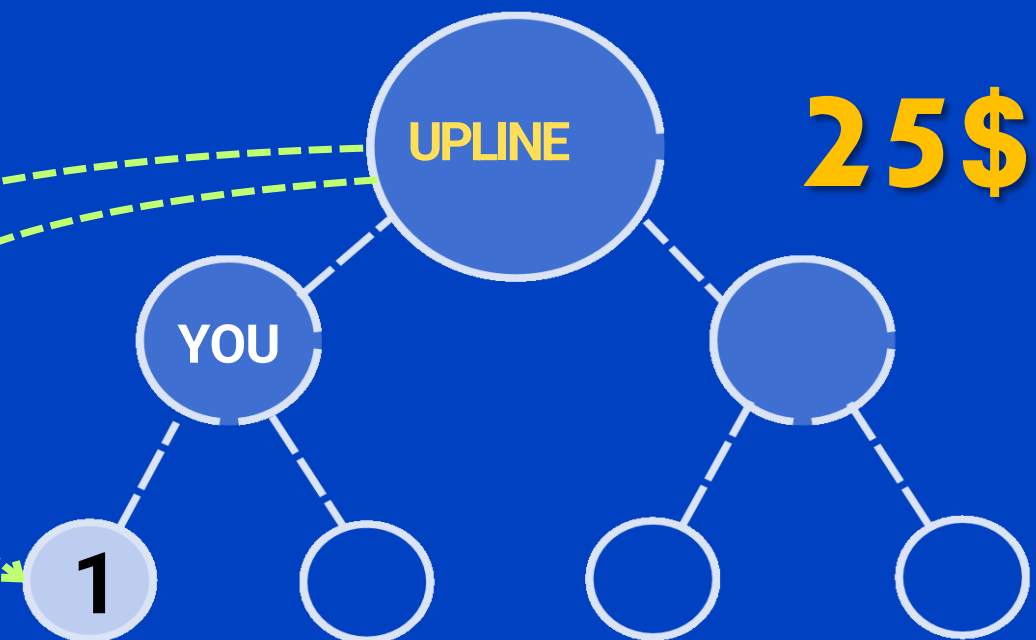

HOLIWAVE

Filling your matrix can happen through your own efforts by inviting participants, spillovers from your upline, or spillovers from below—when downlines who joined through spillovers start inviting others.

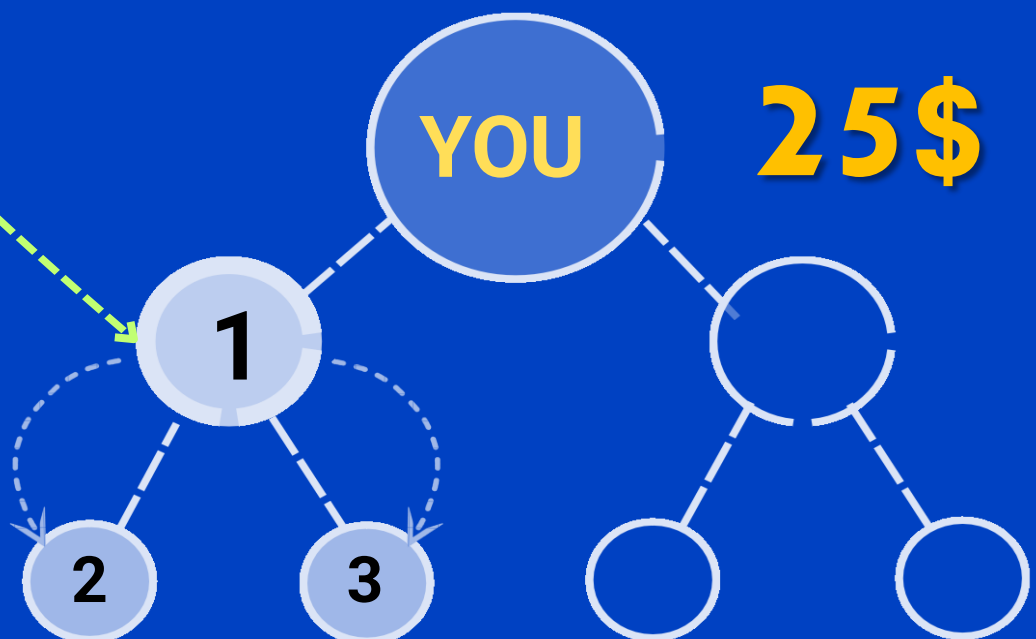

The entire team works together to fill the matrix slots, and payments are not based on which invitee fills a certain spot.

Payments from the second level of your matrix are made up of four payouts, each equal to 100%. When new participants activate their positions in your matrix, the funds are transferred directly to your wallet, which generates income for you.

RE-BUY

You should keep your matrix blocks upgraded to ensure optimal functionality and to avoid missing income opportunities.

When your partners' matrices are reactivated, you may face potential losses in such a situation.

IN TOTAL THE FOUNDATION PLAN 9 LEVELS HAS OF MATRIX SLOTS.

The sequence repeats every three levels: two matrices with 6 spots arranged in two lines, 2+4, and one matrix with three spots in a single line. All of these move simultaneously in parallel, generating profit at the same time.

Each subsequent level can only be activated in order, one after the other: first the second, then the third, then the fourth, and so on.

Net profit refers to the amount you receive directly in your wallet. Income includes the final payment in the matrix, which is allocated for reactivation.

At the conclusion of each matrix cycle, you earn a net profit, along with a newly activated matrix that will continue to generate additional income for you.
